DIGITAL TRANSFORMS PHYSICAL

Onshape is a secure product development platform
for agile businesses building products
and solving real-world problems.

Enterprise Ready

Enterprise Secure

Cloud-Native CAD & PDM

Focus on building great products. Let us do the rest.
Onshape is a file-less CAD and PDM solution. All your design
data is securely stored in modern NoSQL cloud databases.
You will always have a full history of development without
worrying about IT costs and administration.

High Availability

CAD is a mission-critical business capability.
Onshape has a solid record of 99.9% uptime
(trailing 12 months) without crashes or data loss.
Learn more at https://status.onshape.com.

Your users access Onshape in a reliable, secure,
and managed environment (URL) such as
YourCompany.onshape.com.

Scalable Collaboration

**Bring the right people together
in the right way. Then scale.**
Onboard and manage a large number
of CAD and PDM users efficiently and
organize your business around your
most critical data - your product design
and manufacturing data. Unlimited
cloud storage means your Enterprise
scales with you.

Analytics

**Everything you ever wanted to know
in one place.**
Onshape offers enterprises real-time visibility, every
interaction with your company's data, by employees
or external suppliers, is recorded in detail in a
permanent audit trail. Activity, Release, Project and
User Dashboards help teams manage projects and
resources from start to completion making better
decisions and maximizing utilization.

Extensive API

A better way to integrate.
Automate your product development and manufacturing
processes by connecting Onshape to your essential
systems such as PLM and ERP using Onshape's API and
open platform. Onshape also has a cloud-native
connection with Arena PLM for a complete product
development and lifecycle management solution.

Infrastructure and Certifications

Onshape is secure.
Onshape provides a SOC-2 Type II report attesting to the
security, confidentiality and availability of the service.
Onshape is built upon the Amazon Web Services (AWS)
which has multiple global security qualifications.

The SOC-2 Type II report is provided under NDA.

Security and Privacy

The strongest security without compromising agility.
Onshape supports SAML 2.0 for Single Sign On (SSO) for
Azure, Active Directory, Okta and other identity providers,
giving users greater security and convenience.

Onshape's policies and processes are fully aligned
with the requirements of the EU's GDPR,
California's CCPA and other privacy regulations
around the world. Onshape's privacy center.

Third Party Validation

**Alert, vigilant and objectively
evaluated for managing threats.**
Onshape's security team uses top tier
security firms to provide continuous
penetration testing and security
validations against existing and newly
discovered threats.

Automated tools continually test the
Onshape service for existing and emerging
vulnerabilities, and our security configuration
is regularly audited.

Access Control

Stay in complete control, from anywhere.
Admin privileges allow you to manage all users
and teams. With Onshape you can trust R&D to
manage their own data, projects and supply chain.
Access is governed by role-based access controls
(RBAC) including granular read, write, copy,
comment, link, delete and reshare permissions.

Data Protection

Your data is yours.
Onshape is committed to keeping your most sensitive
data protected and portable.

Even if your subscription ends, your data is still privately
and securely stored and exportable.

We do backup and restore testing of Onshape's
databases frequently. All data is encrypted in motion and
at rest to keep your data secure against cyber attacks.
